TECH SPECS

Functions

Hours, minutes, seconds, date (at 3 o'clock)

Case

Swiss made Solid Stainless steel with a satin brushed finish. Stainless steel screw down case back. 37 mm wide (39.5 including the crown), 40 mm long. Water – resistant to 200 meters (660 feet). Bidirectional non-ratcheting rotating bezel. NOS hesalite crystal.

Movement

New 2824-2 Swiss Made ETA self-winding 25 jewel Swiss movement.

Strap

Original NOS black Tropical strap
Canvas, NATO style in black (optional)

Warranty

1 year limited warranty

* Note: The reason for replacing the original movement is that the mainspring has rusted badly, and other parts were gummed up by the lubricating substance used back in the early Sixties. We approached parts and movement suppliers with no success in getting replacements. Remanufacturing parts for a small stock of 60 pieces would have made this watch unaffordable. Then a new ETA 2824-2 became the only option to operate this beautiful timepiece.
